## Professional Summary

Frontend Developer with 10+ years of experience building responsive, high-performing e-commerce websites and customer-facing web applications. Expertise in React.js, JavaScript, HTML5, CSS3, SCSS, Shopify, BigCommerce, Magento, and WordPress with strong focus on frontend performance optimization, responsive design, accessibility, SEO, and cross-browser compatibility. Experienced in developing scalable UI components, managing production releases, integrating GraphQL-based solutions, and delivering customer-focused web experiences in Agile environments.

## Core Competencies

Frontend Development | Figma | React.js Development | JavaScript | HTML5 / CSS3 / SCSS | Responsive Web Design | UI Component Development | e-commerce Website Development | Shopify Development | BigCommerce (Stencil) | GraphQL Integration | WCAG Accessibility | Cross-Browser Compatibility | Production Release Management | Agile / Scrum Methodologies | UI/UX Implementation | Website Maintenance & Troubleshooting | Adobe Photoshop & InDesign

## Technical Skills

|                                  |                                                                             |
|----------------------------------|-----------------------------------------------------------------------------|
| <b>Languages &amp; Libraries</b> | HTML5, CSS3, SCSS, JavaScript, React.js, jQuery, GraphQL                    |
| <b>Frameworks</b>                | Bootstrap, Foundation, Material Design, Tailwind CSS                        |
| <b>CMS Platforms</b>             | BigCommerce (Stencil), Shopify, Magento (1.x/2.x), WordPress                |
| <b>Design &amp; Tools</b>        | Figma, Adobe Photoshop CC, Adobe InDesign CC, VS Code                       |
| <b>Version Control</b>           | Git, SVN                                                                    |
| <b>Testing &amp; Standards</b>   | Cross-browser testing, W3C compliance, SEO optimization, WCAG Accessibility |

## Education

- Master of Computer Applications (MCA), Rajeev Gandhi Technical University, Bhopal (2011)
- Bachelor of Science (P.S.M), SNGGPC College, Bhopal (2008)

## Career Break / Family Relocation

**Jul 2023 – Present**

- Relocated from India to the United States and took a planned career break for family responsibilities and childcare.
- Continued frontend skill development and stayed updated with React.js, responsive web development, accessibility, SEO, and modern e-commerce technologies.

## Professional Experience

**LTIMindtree, Pune, Maharashtra**

**Role - Frontend Developer, June 2021 – June 2023**

**Project:**

- <https://www.sk-ii.com/>

**Key Contributions:**

- Contributed to the development and maintenance of SK-II's global BigCommerce storefront, improving frontend scalability, customer experience, and brand consistency across digital channels while managing promotional campaigns, coupon updates, inventory coordination, and production content releases for live e-commerce environments.
- Led migration from BigCommerce Blueprint to Stencil architecture and implemented GraphQL-based integrations and third-party services, improving frontend maintainability, scalability, product-page responsiveness, and overall e-commerce functionality.
- Reduced page load time by ~20% through image optimization, frontend asset cleanup, responsive rendering improvements, and optimized SCSS/JavaScript implementations across desktop and mobile platforms.
- Improved SEO, accessibility, usability, and cross-browser compatibility through semantic HTML, WCAG/W3C-compliant frontend development, metadata optimization, image compression, and extensive frontend troubleshooting across Chrome, Safari, Firefox, Edge, and mobile browsers.
- Resolved critical frontend defects and production issues while managing frontend deployments, feature releases, inventory updates, and release coordination activities to minimize customer-facing disruptions and improve platform stability.
- Collaborated with developers, QA engineers, product owners, marketing teams, stakeholders, and clients in Agile environments to deliver customer-focused frontend enhancements, conduct review meetings, explain website functionality, and support smooth communication across teams.
- Maintained clean, modular, and scalable frontend code aligned with engineering best practices and reusable component design principles while preparing release reports and supporting operational improvements across production environments.

**Bestway Tours and Safaris Pvt. Ltd, Gurugram, Haryana**

**Role - Frontend Developer, June 2017 – May 2021**

**Projects:**

1. <http://www.bestway.in>
2. <http://bestway2india.com/>

**Key Contributions:**

- Designed responsive travel-booking interfaces, promotional landing pages, banners, and scalable UI assets using Adobe Photoshop and InDesign, improving customer engagement and brand visibility across desktop and mobile platforms.
- Developed responsive mobile-first frontend layouts, reusable UI component libraries, and scalable UI elements using Bootstrap, CSS media queries, and modern frontend frameworks to improve usability, consistency, and maintainability.
- Created and maintained responsive HTML email templates for marketing campaigns, newsletters, and promotional offers, ensuring proper rendering across Gmail, Outlook, and major email clients.
- Improved frontend usability, responsiveness, accessibility, and cross-browser compatibility through semantic HTML, W3C-compliant HTML/CSS implementation, ARIA roles, WCAG standards, and extensive frontend testing across Chrome, Firefox, Safari, Edge, and mobile devices.
- Improved website discoverability and frontend performance through SEO optimization techniques including metadata improvements, image compression, semantic page structures, and customer-focused UI enhancements based on user feedback and analytics.

- Collaborated with cross-functional teams, backend developers, and clients to integrate frontend features, troubleshoot production issues, gather requirements, explain design decisions, and deliver frontend solutions aligned with business goals.
- Maintained scalable and modular frontend codebases, prepared technical documentation, managed multiple frontend deliverables independently, and streamlined development workflows through reusable frameworks and component-based development practices.

**V Group INC., Bhopal, M.P.**

**Role - UI Designer / Developer, August 2012 – October 2016**

**Key Contributions:**

- Developed and maintained storefront experiences across Shopify, BigCommerce, Amazon Seller Central, Magento, and eBay platforms supporting multi-channel e-commerce operations.
- Built reusable responsive UI components that improved frontend consistency, usability, and maintainability.
- Developed responsive HTML email templates to support customer engagement and digital marketing campaigns.
- Collaborated with developers and stakeholders to improve website functionality using customer feedback and web analytics insights.
- Designed banners, promotional assets, and branded UI elements to enhance visual identity and customer engagement.
- Improved frontend responsiveness and cross-browser compatibility across desktop and mobile platforms.
- Implemented W3C-compliant frontend development practices to improve accessibility, maintainability, and standards compliance.
- Improved SEO performance through image optimization, semantic HTML implementation, and SEO-friendly page structures.
- Communicated openly with clients and team members to ensure designs met business goals and customer needs.
- Provided training to clients and teams, helping them update and manage website content easily.
- Proactively managed tasks by setting clear priorities, ensuring timely completion with high-quality results.

**Sakshi Tech Solutions, Bhopal, M.P**

**Role – Junior UI Designer / Developer, December 2011 – June 2012**

**Key Contributions:**

- Converted UI/UX design wireframes into responsive and interactive web pages using HTML and CSS.
- Ensure cross-browser compatibility and responsiveness.
- Work closely with UI/UX designers to bring mockups and prototypes to life.
- Collaborate with backend developers to integrate UI with APIs and databases.
- Identify and fix UI issues and bugs.
- Optimize front-end code for better performance and user experience.
- Conduct basic UI testing to ensure usability and accessibility.
- Effectively prioritized tasks to ensure timely completion while maintaining high-quality results.
